

BOAR DOOR

Smart boar door with a special handle

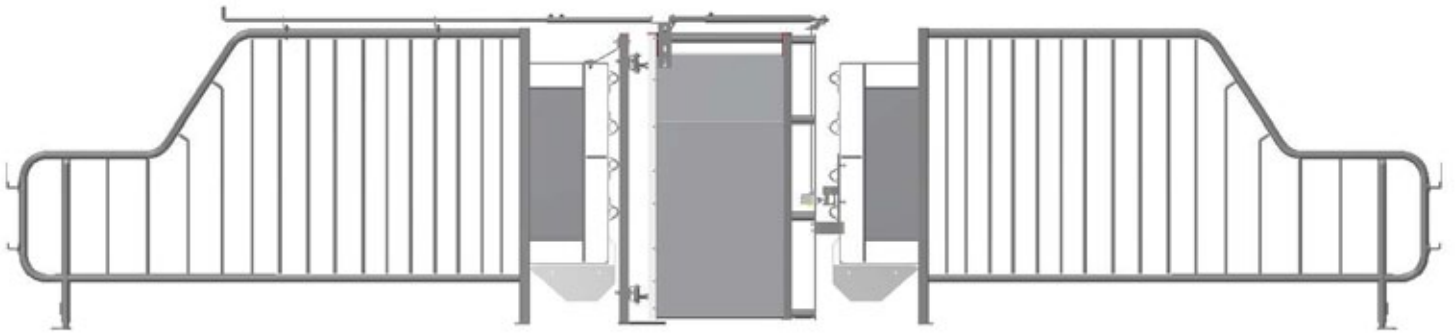

- Operated without entering the box
- Can be adjusted on site
- Reversible
- Easy to slam

| BOAR DOOR |

With a long handle - for easier insemination process

This special boar door is designed in order to make the insemination process easier. Thanks to the long handle, the door can be open from the distance, without entering the mating box. To ensure long durability, the door can only be opened in one direction, as the lock stop is mounted (optional right or left). It makes it easier to slam the door, when the boar has passed.

Boar door H: 110 cm, for JUMB-O-FINE and LD-box
Article nr. 1910275

Good contact between a sow and a boar.

The angle bracket is a backstop for the boar door.

Subject to changes in materials and design is reserved.
